5. Complete the form and click '**register.**'
6. **Check your email** for the validation email from WatchTVEverywhere and click on the validation link located in the email.
7. Congratulations! **You may now log in** and see what networks are available for your computer, laptop, tablet, and smartphone.

## Frequently Asked Questions

**Q: How do I use *WatchTVEverywhere*?**

**A: There are two ways to *WatchTVEverywhere*:**

1. Visit [www.watchtveverywhere.com](http://www.watchtveverywhere.com) and log in. You will be presented with a list of networks that are available to you. Click on the network you want to watch. If the network you selected has an app available for your device, you will be directed to your app store to either open or download the app. Otherwise, you will be taken to the network's website.
2. Open a network app – ESPN—for example—directly on your device. Log in and start watching.

TIP: For quick and easy access to all the networks available through *WatchTVEverywhere*, add the watchtveverywhere website to your device's home screen.

**Q: How is *WatchTVEverywhere* different from other online video streaming services?**

A: *WatchTVEverywhere* is included at no additional charge with your cable TV subscription. *WatchTVEverywhere* is an extension of your cable TV subscription. It allows you to watch the same shows and programs you watch on TV from wherever you are, whenever you want.

Streaming services like Netflix, Amazon Prime and Hulu are a monthly subscription service and offer only past seasons of shows so you have to wait to watch the current season. With *WatchTVEverywhere*, you can watch the current season of your favorite shows within days of their premiere.

**Q: How much does it cost?**

**A:** Nothing. *WatchTVEverywhere* is a service provided by FMCTC at no additional cost.

**Q: Does watching *WatchTVEverywhere* count against my mobile data plan?**

**A:** It might. Check the data plan for your cellular network or Internet service before you start using *WatchTVEverywhere*. Please keep in mind that data overage charges may apply from your cellular carrier or Internet provider. Streaming video transmits a lot of data so it is very easy to go over your data plan. Please know that we have no way of knowing when you have exceeded your data plan. You are responsible for all of the charges made by your mobile carrier.

**Q: Where can I watch *WatchTVEverywhere*?**

**A:** Just about Everywhere! *WatchTVEverywhere* works anywhere you can receive an Internet signal. Wired connections and in-home Wi-Fi will provide the best quality. The quality of streaming while connected to a public WiFi network or your cellular network, like at a restaurant, will vary depending on the strength of the signal.

Content authorized through *WatchTVEverywhere* is only accessible in the US and US territories.

**Q: What can I watch?**

**A:** Each network determines what programs to make available, when, and the length of time they are available. FMCTC has no control over what is made available. Generally, networks have the most recent episodes of TV shows, past episodes and seasons of TV shows available for you watch. They may include movies. Some networks include a live feed of the network.

**Q: Why aren't all the networks I subscribe to available?**

**A:** Not all networks and channels make their programs available online. As new networks are added, they will be added to the Networks page on [watchTVEverywhere.com](http://watchTVEverywhere.com).

**Q: Will other networks become available?**

**A:** Yes. We are continually working with networks to make them available through *WatchTVEverywhere* to expand what's available to you.

**Q: How many different devices can I use?**

**A:** There is no limit to the number of devices you can use. However, TV networks may limit the number you can use at the same time. Please refer to the policies and terms of use for each app you use for details.
